CLAIMS 1-62 AND 81-88 ARE PRESENTED FOR
EXAMINATION

DETAILED ACTION

Applicant's election of Group II, claims 81-88, in Paper No. 8 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Further restriction is required.

Election/Restrictions

Claim 81 is generic to a plurality of disclosed patentably distinct species comprising various synergistic compositions of corticosteroids and N-substituted benzamide compounds as set forth in claims 1-16 and 20-29 (Group I) and claims 17-19 (Group II). Should applicant elect Group II a combination of an enhancing GABA-A neurotransmission agent and a decreasing NMDA-type glutamate neurotransmission agent.

Examination will be performed as to the elected combination since at page 13, lines 14-18 of the specification applicant teaches that the invention relates to a synergistic combination since the claimed combination prolongs the duration of action of a dose of the mixture.

Art Unit: 1617

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species of each agent, even though this requirement is traversed.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
